

Nivika's 45-Day Daily AI/ML Roadmap (Codebasics)

Day 1 - Python Basics

Topic(s): Variables, Data Types, Operators

Source(s):

<https://www.codebasics.io/path/python-basics>

Exercises:

Write programs using different data types and operators

Project Task:

Create a simple calculator

Debugging Task:

Fix type errors in provided code

Documentation Task:

Document your learning

GitHub Task:

Create GitHub repo for the roadmap

Notes:

Focus on understanding data types deeply
